 - Pseudoephedrine
 - All Intranasal Corticosteroids
 - Benzonatate
 - Albuterol MDI and Nebules
- Approved by Committee to recommend to Board of Pharmacy without Dextromethorphan and OTC

Next Steps

- These committee recommendations now go to rulemaking. Typically a 6 month process, but board is trying to expedite (no staff added since law passed). Will have to see with first few concepts how long it takes.
- Submission form to go live????
- Board strongly desires that initial topics should be less aggressive and controversial to get past learning curve with this process.
- Plan is for committee to meet quarterly going forward.
